Hvernig breytir þú korti með því einu að hjóla eða keyra og án þess að vita af því?

## Slide Tool Demo

First, draw an coarse polyline of the red and blue heat data.

When you're done, click 'Slide' and watch it match the high density corridors of Strava data.

The screenshot displays the Strava Slide web application interface. At the top left, the Strava logo is visible, followed by the text "Includes the Slide add-on" and "Select feature type" with a close button (X). Below this is a search bar labeled "Search".

The sidebar on the left contains a list of feature types, each with an icon and a label:

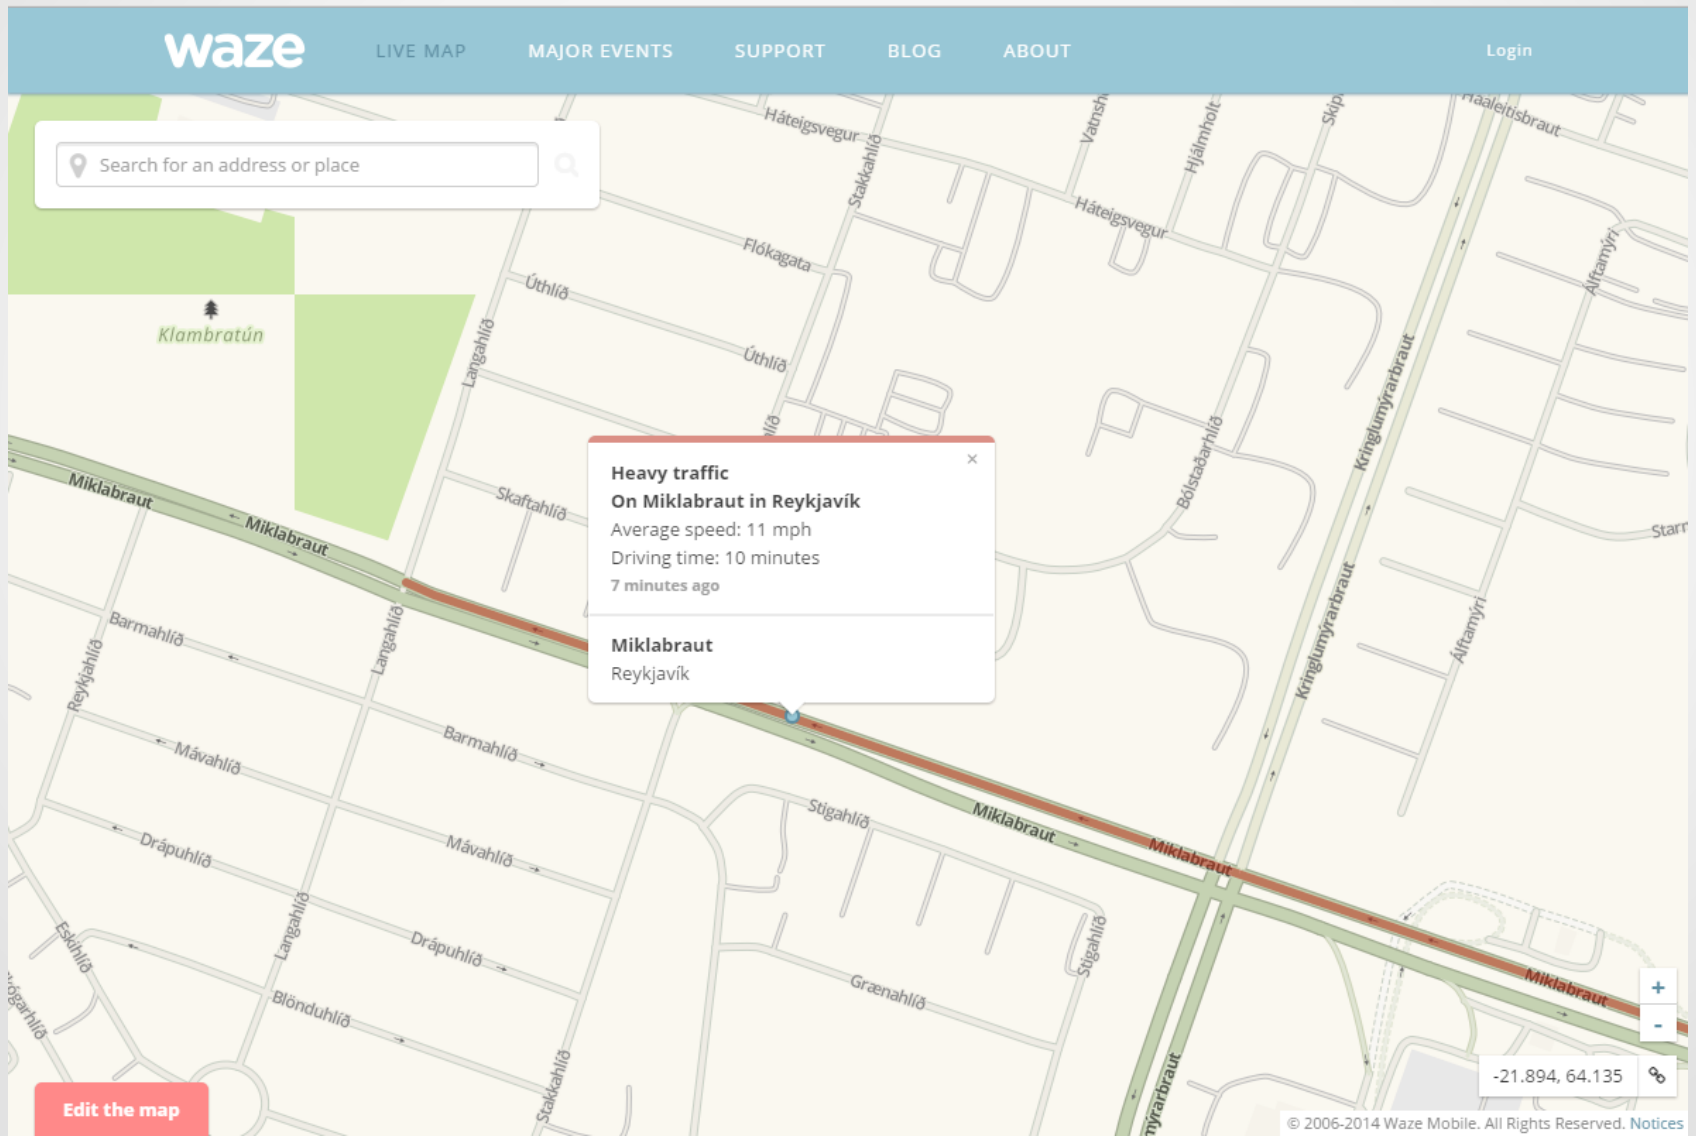

- Road (car icon)
- Rail (train icon)
- Path (triangle icon)
- Water (water drop icon)
- Power Line (power line icon)
- Line (triangle icon, currently selected)

The main map area shows a satellite view of a region with a red line feature overlaid. The line starts near a lake labeled "Silungapollur" and extends to the right. A toolbar at the top of the map includes buttons for "Point", "Line", "Area", "Undo", "Redo", "Save", and a notification badge with the number "3". On the right side of the map, there are zoom in (+) and zoom out (-) buttons, a compass, and a full-screen button.

At the bottom of the map, there is a copyright notice: "bing © 2014 DigitalGlobe, Earthstar Geographics SIO, © 2014 Microsoft Corporation". To the right of this, it says "Strava Global Heat". At the very bottom, there is a footer with the text "Edits by Stalfur, Evar Arnjörð Bjarmason, Amaroussi, and 8 others", a version number "1.6.2-slide", a user profile icon for "Stalfur", and a "logout" link.
